PREFACE

The Ninth Decennial Census of Canada was taken as of June 1, 1951. Volume II, the second of eleven volumes giving final results of the census, deals specifically with cross-classifications of population characteristics.

The various tables of this volume present population characteristics according to three general cross-classifications, as follows: age groups and sex (Tables 1-29); origin and sex (Tables 30-53); and period of immigration for the immigrant population (Tables 54-61). The results of the census of blind and deaf persons are also included in this volume (Tables 62-76).

Preceding the tables is a short Introduction which includes various definitions and explanations of census terms used throughout the volume. An Appendix presents a graduated age table showing the population by single years of age and sex for Canada and the provinces, 1951.

The materials for this volume were prepared in the Population Section of the Census Division.

PRÉFACE

Le neuvième recensement décennal du Canada a été effectué à compter du 1^{er} juin 1951. Le Volume II, le deuxième des onze volumes qui contiennent les résultats définitifs du recensement, donne plus particulièrement un classement recoupé des caractéristiques de la population.

Les divers tableaux du volume donnent les caractéristiques de la population d'après trois classements recoupés généraux: groupes d'âge et sexe (tableaux 1-29); origine et sexe (tableaux 30-53); et période d'immigration de la population immigrée (tableaux 54-61). Les résultats du recensement des aveugles et des sourds sont aussi inclus dans le présent volume (tableaux 62-76).

Une brève introduction précède les tableaux et comprend certaines définitions et explications des termes de recensement employés dans le volume. L'Appendice contient un tableau gradué de l'âge, qui montre la population par année d'âge et selon le sexe pour le Canada et les provinces, en 1951.

La matière du volume a été préparée par la Section de la population de la Division du recensement.

INTRODUCTION

The tables of Volume II present cross-classifications by (a) age and sex and (b) origin and sex according to such characteristics as marital status, religious denomination, birthplace, period of immigration, citizenship, years of schooling, official language and mother tongue. Detailed classifications of age groups and origin are shown in the tables for Canada as a whole, while broader age and origin groupings are used for provinces and cities of 30,000 and over. The rural and urban division is traced throughout the volume with the rural population further classified by farm and non-farm residence. Characteristics of the immigrant population according to period of immigration by sex, birthplace, country of allegiance, official language and mother tongue as well as the census of blind and deaf persons are also included in this volume.

Rural and Urban.— Prior to the 1951 Census, the population residing within the boundaries of incorporated cities, towns and villages, regardless of size, was classified as urban and the remainder as rural. In the 1951 Census the aggregate size of population rather than provincial legal status was the main criterion for the rural-urban definition. The urban population in 1951 includes all persons residing in cities, towns and villages of 1,000 and over, whether incorporated or unincorporated, as well as the population of all parts of census metropolitan areas. The 1951 rural-urban definition has the advantage of creating a uniform line of demarcation between the rural and urban population across Canada. This was not obtained formerly because of the varying laws of incorporation among provinces.

Farm Population.— A number of tables in this volume classify the rural population by "farm" and "non-farm" residence. The "farm" population comprises all persons living on a farm in a rural area, regardless of their occupation. A farm, for census purposes, is a holding on which agricultural operations are carried out and which comprises:

- (i) three acres or more in size, or
- (ii) from one to three acres in size with agricultural production in 1950 amounting to \$250 or more.

Age.— The age enumerated was the person's exact age at his last birthday prior to the census date. Tables of this volume show population characteristics cross-classified by five-year age groups for Canada with broader age groupings for provinces and cities of 30,000 and over.

Origin.— For census purposes a person's origin or cultural group was traced through the father. For example, if a person's father is German and mother Norwegian the origin was entered as German. Wherever applicable the origin of a person was established by asking the language spoken by the person or the paternal ancestor on first arrival to this continent. In the event that this question was not understood by the respondent, or the person's origin could not be established from the answer received, the enumerator asked a further question such as: "Is your origin in the male line English, Scottish, Ukrainian, Jewish, Norwegian, North American Indian, Negro, etc.?" Persons who were not able to state their origin were recorded as "Unknown". Persons who reported themselves as "Canadian" or "American" were recorded as such. The number of persons reported as "Unknown", "Canadian" or "American" is included with the group "Other and not stated" in the origin tables of this volume.

INTRODUCTION

Les tableaux du volume II donnent une classification de la population selon: a) l'âge et le sexe et, b) selon l'origine et le sexe, recoupée par certaines caractéristiques telles que l'état matrimonial, la dénomination religieuse, le lieu de naissance, la période d'immigration, la citoyenneté, les années d'école, la langue officielle et la langue maternelle. Les tableaux consacrés au Canada entier donnent des classifications détaillées des groupes d'âge et des origines; dans le cas des provinces et des cités de 30,000 et plus, on a employé des groupements plus larges selon l'âge et l'origine. Dans tout le volume, la répartition entre la population rurale et la population urbaine est suivie d'un classement de la population rurale selon qu'elle est agricole ou non agricole. Les caractéristiques de la population immigrée selon la période d'immigration, par sexe, lieu de naissance, pays d'allégeance, langue officielle et langue maternelle, de même que les résultats du recensement des aveugles et des sourds sont aussi contenus dans le volume.

Population rurale et population urbaine.— Avant le recensement de 1951, la population qui habitait dans les limites des cités, des villes et des villages constitués était classée, indépendamment de son importance numérique, comme population urbaine et, le reste, comme population rurale. Au recensement de 1951, le principal critère qui a servi au classement de la population selon qu'elle était rurale ou urbaine a été l'importance numérique globale plutôt que le statut juridique provincial. La population urbaine comprenait par conséquent, en 1951, toutes les personnes qui demeuraient dans les cités, villes et villages de 1,000 habitants et plus, constitués ou non, de même que la population de toutes les parties des zones métropolitaines de recensement. La définition rurale-urbaine de 1951 a pour avantage d'établir une ligne de démarcation uniforme entre la population rurale et la population urbaine du Canada, ce qui n'avait pu être réalisé avant, à cause de la diversité des lois qui régissent la constitution dans les provinces.

Population agricole.— Un certain nombre de tableaux du volume classent la population rurale selon la résidence "agricole" ou "non agricole". La population "agricole" comprend toutes les personnes vivant sur une ferme dans une région rurale, quelle que soit leur occupation. Aux fins du recensement, la ferme est une terre servant à l'exploitation agricole et ayant une superficie:

- (i) de trois acres ou plus, ou
- (ii) d'une à trois acres et une production agricole de \$250 ou plus en 1950.

Âge.— L'âge, au dénombrement, est l'âge exact de la personne au dernier anniversaire qui précède la date du recensement. Les tableaux du présent volume donnent les caractéristiques de la population, recoupées par groupes d'âge quinquennaux pour le Canada et par groupes d'âge plus larges pour les provinces et les cités de 30,000 et plus.

Origine.— Aux fins du recensement, l'origine d'une personne ou le groupe culturel auquel elle appartient est déterminé par la famille du père. Ainsi, lorsque le père de la personne recensée est allemand et sa mère norvégienne, l'origine de cette personne est allemande. Chaque fois que la chose a été possible, l'origine de la personne a été déterminée par la langue qu'elle parlait ou que son ancêtre paternel parlait lorsqu'il est débarqué sur le continent. Quand la personne ne comprenait pas cette question ou que son origine ne pouvait être ainsi déterminée, l'agent recenseur posait d'autres questions de ce genre: "Votre lignée paternelle est-elle anglaise, écossaise, ukrainienne, juive, norvégienne, indienne de l'Amérique du Nord, nègre ou autre?" Les personnes qui ne pouvaient fixer leur origine étaient classées dans "Inconnue". Les personnes qui se déclaraient "Canadiennes" ou "Américaines" ont été ainsi inscrites. Les personnes déclarées d'origine "Inconnue", "Canadienne" ou "Américaine" sont comprises dans le groupe "Autre et non déclarée" des tableaux du présent volume qui porte sur les origines.

Special rules governed the enumeration of the origin inquiry in 1951 for persons of mixed Indian and white parentage, as follows:

- (a) For those living on Indian reserves the origin was recorded as "Native Indian".
- (b) For those not on reserves the origin was determined through the father by the usual procedure.

This differs from the procedure of the 1941 Census where persons of mixed Indian and white parentage were shown as "Half-breed".

Marital Status.— Each person enumerated was classified according to marital status viz., single, married, widowed or divorced. Figures under married include all married persons whether living together or apart for any reason, unless a divorce had been obtained.

Religious Denomination.— The specific religious denomination of which the person was either a member or to which he adhered or favoured was enumerated. Broad terms such as "Christian", "Catholic", "Protestant" and "Believer" were not accepted, and distinction was made between the Ukrainian (Greek) Catholic and Greek Orthodox Churches. Persons who stated they had no religion were entered as "None".

Birthplace.— For persons born in Canada the province or territory of birth was recorded while for persons born outside of Canada the country of birth as it was constituted at June 1, 1951, was entered. Distinction was made between persons born in Northern Ireland and the Republic of Ireland.

Period of Immigration.— For persons born outside of Canada the period that the person first came to reside in Canada was recorded.

Citizenship.— Every person was required to report citizenship (nationality), stating the country of allegiance. Under the citizenship regulations in force at the date of the 1951 Census the following were considered citizens of Canada providing they had not otherwise lost their citizenship:

- (a) Persons who were born in Canada.
- (b) Persons who were born in the United Kingdom or other British Commonwealth countries and had completed 5 years residence in Canada prior to January 1, 1947, or had obtained a citizenship certificate. For persons born outside the British Commonwealth of Nations, naturalization papers are required in addition to 5 years residence prior to the date of the Citizenship Act or the acquisition of a citizenship certificate after that date, except in cases (c) and (d) below.
- (c) Any woman who married a Canadian citizen prior to January 1, 1947, or obtained a citizenship certificate after that date.
- (d) Any person whose father was a Canadian citizen at the time of birth and the person
 - (i) was under 21 years of age at the census date;
 - (ii) asserted Canadian citizenship before the twenty-second birthday.

In the case of persons owing allegiance to another country, the name of the country was recorded as "United States", "China", "Finland", etc. Persons of stateless or unknown citizenship were enumerated accordingly.

Des règles spéciales régissaient en 1951 l'emploi de la question relative à l'origine des personnes d'ascendance mixte (race indienne et race blanche):

- a) Dans le cas des personnes qui vivaient dans des réserves indiennes, l'origine inscrite était "Indienne".
- b) Dans le cas des personnes qui ne vivaient pas dans des réserves, l'origine a été déterminée par l'ascendance du père, c'est-à-dire d'après la méthode habituelle.

Cette méthode diffère de celle qui fut employée au recensement de 1941, alors que les personnes d'ascendance mixte (race indienne et race blanche) étaient déclarées "Métisses".

État matrimonial.— Lors du recensement, chaque personne a été classée selon l'état matrimonial ou: célibataire, mariée, en veuvage ou divorcée. La classification "mariée" comprend toutes les personnes mariées, vivant ensemble ou séparées pour une raison quelconque, à moins qu'elles n'aient obtenu un divorce.

Dénomination religieuse.— Le dénombrement indique la dénomination religieuse particulière à laquelle la personne appartient ou adhère ou qu'elle favorise. Les termes généraux de "chrétien", "catholique", "protestant" et "croyant" n'ont pas été acceptés et la distinction a été établie entre les religions ukrainienne (grecque) catholique et grecque orthodoxe. Les personnes qui se sont déclarées sans religion ont été incluses dans "Aucune".

Lieu de naissance.— Dans le cas des personnes nées au Canada, la province ou le territoire où elles sont nées a été inscrit et, pour les personnes nées ailleurs qu'au Canada, c'est le pays de naissance, tel qu'il était constitué au 1^{er} juin 1951, qui a été déclaré. Une distinction a été établie entre les personnes nées en Irlande du Nord et celles qui sont nées dans la république d'Irlande.

Période d'immigration.— Dans le cas des personnes nées en dehors du Canada, la période où une personne est venue au Canada la première fois pour y demeurer a été inscrite.

Citoyenneté.— Chaque personne devait déclarer sa citoyenneté (nationalité) et mentionner son pays d'allégeance. En vertu des règlements de la citoyenneté, en vigueur à la date du recensement de 1951, les personnes décrites ci-après étaient considérées comme des citoyens du Canada, à moins d'avoir autrement perdu leur citoyenneté:

- a) Les personnes nées au Canada.
- b) Les personnes nées dans le Royaume-Uni ou dans d'autres pays du Commonwealth britannique et qui avaient résidé cinq ans au Canada avant le 1^{er} janvier 1947, ou avaient obtenu un certificat de citoyenneté. Pour les personnes nées en dehors du Commonwealth britannique, le certificat de naturalisation est exigé en plus des cinq années de résidence avant la date de la loi sur la citoyenneté, ou en plus du certificat de citoyenneté obtenu ultérieurement à cette date, sauf dans les cas c) et d) ci-dessous.
- c) Une femme qui a épousé un sujet canadien avant le 1^{er} janvier 1947 ou qui a obtenu un certificat de citoyenneté après cette date.
- d) Une personne dont le père était citoyen canadien lorsque cette personne est née et si la personne
 - (i) avait moins de 21 ans à la date du recensement;
 - (ii) a affirmé sa citoyenneté canadienne avant son vingt-deuxième anniversaire.

Dans le cas des personnes qui doivent allégeance à un autre pays, le nom de ce pays a été inscrit, soit: "États-Unis", "Chine", "Finlande", etc. Les personnes apatrides ou de citoyenneté inconnue ont été inscrites en conséquence.

Years of Schooling.— The total number of years of schooling of every person was obtained in the census. This included the total number of school years the person attended any kind of educational institution such as elementary school, secondary school, college or university. Kindergarten or nursery school did not count as a year of schooling. Private study or part-time attendance at classes counted for the number of years of formal schooling to which they were equivalent.

School Attendance.— In addition to the question on years of schooling a further inquiry was asked in the census to determine the number of persons who had some regular day-time attendance at any type of formal school or university since September 1950 (i.e. in the school year preceding the census date).

Official Language.— Every person in Canada was asked whether they could speak English and whether they could speak French, the two official languages of Canada. Persons indicated in the tables of this volume as speaking "English only" or "French only" may speak other languages.

Mother Tongue.— A second question on language inquired the mother tongue of each individual. "Mother tongue" is the language the person first learned in childhood and still understands. In the case of infants this refers to the language commonly spoken in the home.

Blind and Deaf Population.— Upon completion of the enumeration of each household, the enumerator was instructed to determine if any person enumerated was blind or deaf. For such cases an additional schedule was completed recording the type of infirmity and the age at which the person became blind or deaf. The last section of this volume, Tables 62 to 76, contains the compilation of the information thus obtained.

Persons recorded as blind or deaf in the 1951 Census did not include those with partial hearing or vision. Persons blind in one eye, for example, were not recorded as blind. Similarly, only persons with no usable hearing were classed as deaf for census purposes. Partially deaf persons, such as those who can hear with the help of a mechanical aid, were not included.

Années d'école.— Le nombre total d'années d'école de chaque personne a été obtenu lors du recensement. Il comprend le total des années d'école que la personne a passées dans toute maison d'enseignement comme: école primaire ou élémentaire, école secondaire ou supérieure, collège ou université. Le jardin d'enfance ou l'école maternelle ne comptent pas comme une année d'école. Les études privées et la fréquentation à temps discontinu équivalent au nombre correspondant d'années d'études régulières.

Fréquentation scolaire.— En plus de la question relative aux années d'école, une autre question a été posée lors du recensement, en vue de déterminer le nombre de personnes qui avaient suivi de façon assidue des cours réguliers de toute école ou université reconnue, à un moment quelconque depuis septembre 1950, c'est-à-dire l'année qui a précédé la date du recensement.

Langue officielle.— Chaque personne au Canada a été priée de dire si elle parlait l'anglais ou le français, les deux langues officielles du Canada. Les personnes figurant aux tableaux du présent volume comme ne parlant que l'anglais ou que le français peuvent parler d'autres langues.

Langue maternelle.— Une seconde question relative à la langue portait sur la langue maternelle de chaque personne. La "langue maternelle" est la première apprise au cours de l'enfance et que la personne comprend encore. Dans le cas des bébés, elle sera la langue habituellement parlée au foyer.

Aveugles et sourds.— A la suite du dénombrement de chaque ménage, l'agent recenseur devait s'enquérir si l'une ou l'autre des personnes inscrites était aveugle ou sourde. Suivant le cas, une formule supplémentaire était complétée, qui déterminait le genre d'infirmité et l'âge auquel la personne avait été frappée de cécité ou de surdité. La dernière section du volume contient ces renseignements dans les tableaux 62 à 76.

Les personnes déclarées aveugles ou sourdes au recensement de 1951 ne comprennent pas celles qui ont l'usage partiel de la vue ou de l'ouïe. Les personnes borgnes, par exemple, ne sont pas classées parmi les aveugles. De même, seules les personnes qui souffrent de surdité complète sont déclarées sourdes au recensement. Les personnes atteintes de surdité partielle, comme celles qui peuvent entendre à l'aide d'un appareil, ne sont pas incluses.
